

Classroom as Community

Teaching Assistant Orientation 2023

Bruce Baigrie

**PhD Student in Geography and
Environment at Maxwell School**

Ayşenur Değer

**PhD Candidate in Political Science at
Maxwell School**

Think back to when you were a student...

Reflect on your best and worst classroom experience:

- 1. What made it a good or challenging space for learning?*
- 2. How did the instructor facilitate a better learning environment, or how could they have altered their mode of instruction in order to do so?*
- 3. What could you learn from this experience and use to shape your own teaching?*

Examples - Best classroom experience

What made this a rewarding classroom experience?

- Engaged classroom
- Students who hadn't spoken before suddenly were doing so
- Took in and understood content better than ever

Examples - Best classroom experience

What aspects of this experience I can integrate my own teaching?

- How to facilitate classroom discussions while still guiding them towards learning outcomes
- How to make lecture content more relatable to students' experiences

Examples - Worst classroom experience

What made this a challenging classroom experience?

- No good explanation of the subject
- Professor reading the material
- Little to no engagement w/students
- Students had varied background knowledge on the subject
- Little to no feedback on work

Examples - Worst classroom experience

Things I learned from this experience that shape my teaching

To build a community:

- Interactive teaching – asking questions, hearing questions
- Getting feedback to students, and getting feedback from them early on in the semester

Are crucial

We would like to hear from you

- Your best classroom experience
- Your worst classroom experience

Learning Objectives for Today

1. What is classroom community and why would we want it?

1. Rapport and Trust: Keys to community

1. Building Community on Day One

1. Ensuring Consistent Community

What is “Community” in the Classroom?

“Classroom community is **strong** when learners feel:

- **connected** both to each other and the instructor (reduced social and psychological distance between people)
- share **interests & values, trust each other**, actively engage in two-way communications, & pursue common learning objectives” (Kay and Summers 2011, 231).

What is “Community” in the Classroom?

What words do you
associate with a strong
classroom community?

Results

Why do we want classroom community?

Strong classroom community can create a sense of belonging, which in turn leads to....

- **Better academic outcomes and improved retention** (Freeman et al. 2007 & Kay and Summers 2011)
- **More academic motivation** (Kay and Summers 2011)
- **More time spent in class on “on-task”** (Bowen 2021)
- **Reduction in disparities between groups** (Walton and Cohen 2011)

Rapport and Trust: Keys to Community

Why rapport?

Rapport (the relationship between two people) has been shown to be important for learning, and cognitive performance.

Rapport and Trust: Keys to Community

What it is **actually** is:

How do we build it?

“Rapport is defined as an overall feeling between two people

Bidirectional relationships are key – i.e. relationships (must) encompass a mutual, trusting, and prosocial bond. (Fisher and Martin 2019, 147)

and both ways between students and professor, and when possible, between students as well.

Our challenge is to turn that into an interpersonal **classroom** dynamic

Building classroom community

Strategies for day one

Introducing yourself

Think about going beyond a simple introduction...

Consider explaining:

- How you got to SU
- Why this topic/course matters to you/why it's useful

How I do it...

How I got here

KEY TO SPECIES

1. Red-billed Tropicbird	21. African Duck
2. Yellow-billed Cuckoo	22. Doves/Cuckoo
3. Spotted Thrush	23. Black-headed Gull
4. Grey Heron	24. Cape Sparrow
5. Great Egret	25. Magpie
6. Cape White Heron	26. Kingfisher
7. Great Frigatebird	27. Cape Lark
8. Spur-winged Goose	28. Kingfisher
9. Pelican	29. Kingfisher
10. Great Egret	30. Kingfisher
11. Great Egret	31. Kingfisher
12. Great Egret	32. Kingfisher
13. Great Egret	33. Kingfisher
14. Great Egret	34. Kingfisher
15. Great Egret	35. Kingfisher
16. Great Egret	36. Kingfisher
17. Great Egret	37. Kingfisher
18. Great Egret	38. Kingfisher
19. Great Egret	39. Kingfisher
20. Great Egret	40. Kingfisher
21. Great Egret	41. Kingfisher
22. Great Egret	42. Kingfisher
23. Great Egret	43. Kingfisher
24. Great Egret	44. Kingfisher
25. Great Egret	45. Kingfisher
26. Great Egret	46. Kingfisher
27. Great Egret	47. Kingfisher
28. Great Egret	48. Kingfisher
29. Great Egret	49. Kingfisher
30. Great Egret	50. Kingfisher

RONDEVLEI 2007

False Bay Ecology Park

Vision

To become one of the leading communication environmental education, recreation and leisure centres in the region providing environmental, cultural, social and economic opportunities and benefits for all Cape Townians particularly those in socially disadvantaged areas.

Objectives

- Enhancing and enhancing biodiversity
- Providing and promoting environmental education
- Creating environmental and recreation opportunities
- Solving to create job opportunities
- Solving to have financial self-sufficiency of the Park

Getting to know them *as they get to know each other*

Everyone should have a chance to speak... but there's an opportunity for **rapport**.

Consider asking students to *introduce each other*.

Getting to know them *as they get to know each other*

Beyond the
breaker q

- What's
- What i
- in lear
- If you
- (Some

ve ice-

nterested
(e)

Getting to know them *using a student survey*

You should ask:

- Preferred name
- Pronouns
- Classroom accommodations

And could consider asking:

- If there's anything they might need you to know to improve their classroom experience
- If there is anything related to the class they are particularly nervous about

Setting expectations

Using a section syllabus

- Clarifies your role
- Includes information about office hours, email, grading, behavior, technology use, and absences

Other strategies for setting ground rules

- Interactive Option - crowd source from students
- But be careful! Maintain your authority – “it’s not a democracy”

Ensuring consistent community

Strategies for after day one

Strategies after the first day - *Communication*

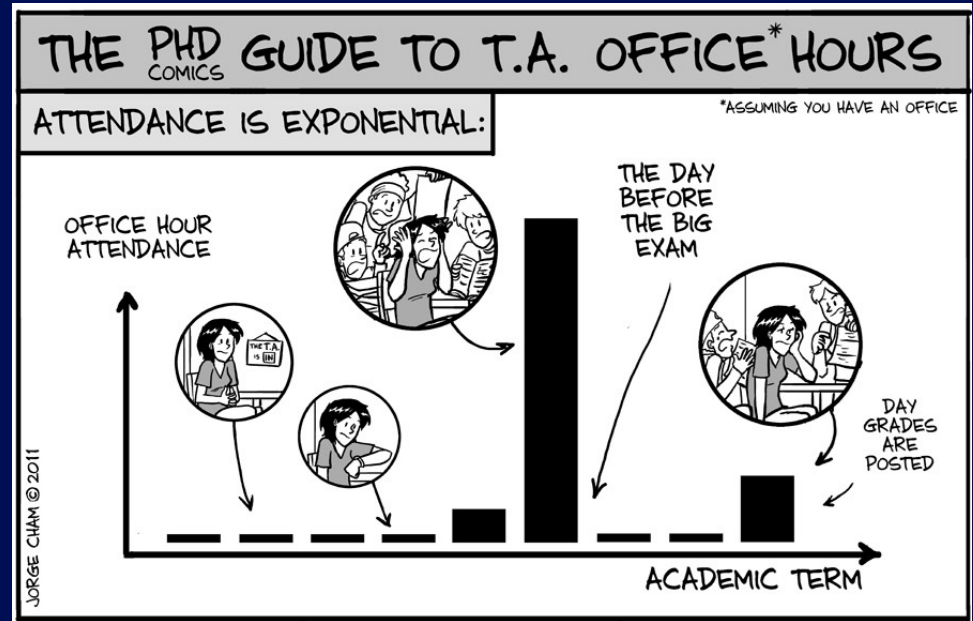

In the classroom

- Call students by name, and don't be afraid to ask again
- Ask probing questions and don't be afraid of the silence!
- Engage in positive nonverbal behaviors such as smiling and nodding
- Be willing to learn with them
- Check-in on student needs throughout the semester (e.g. mid semester evaluation)

Strategies after the first day - Communication

Outside the classroom

- Email your students and/or use Blackboard announcements
- Schedule meetings to be in-person when possible
- Encourage students to come to office hours

Strategies after the first day - *Ensuring interaction*

Consider integrating the following into your lessons:

- Active learning strategies (e.g. collaborative group work)
- Elements of choice and connection to lived experience
- References to students' past comments
- Responses that show students' their participation is valued, even if you need to correct them

Strategies after the first day - *Ensuring interaction*

Consider integrating the following into your lessons:

- Active learning strategies: debates, small group tasks, presentations
- Making room for introverted students
- Starting lessons with talking about recent events on the campus, or news from the world
- “What did you read or saw this week that you found interesting?”
- Don’t let poor participation in a week to discourage you from trying!

Challenges to building community

- Technology use
- Tensions between your relationship with your supervisor and the students (can't be your students)
- Quiet classes or disruptive classes
- Difficult students and hot moments...

Some final thoughts

Don't be hard on yourself, especially since

Every class is different and some of them are in your hands.

Take some time to reflect on what's going on

Then use the **available resources** - co-TAs, professors etc.

Most of your students want you to succeed!

While it's critical to keep your **authority**, be **honest** and **open** with them.

Thank you!

Questions?
